FOREWORD

The Construction Industry is a fundamental economic sector which facilitates most of the other sectors as it transforms various resources into constructed physical economic and social infrastructure necessary for socio-economic development. It embraces the process by which the physical infrastructure are planned, designed, procured, constructed or produced, altered and maintained. Thus, the realization of Vision 2025 partly depends on existence of a reliable and competitive physical infrastructure that is capable of delivering quality services and value for money in the development of the Country.

The goal of the Construction Industry is to develop an internationally competitive industry that will be able to undertake most of the Construction projects in Tanzania and export its services and products and ensure value for money is realized as well as protection of environmental in the implementation of construction projects. Likewise, availability of the realistic data and effective use of the data will facilitate in planning and management as well as in the subsequent implementation of various projects/programs.

In realization of the importance of the above facts, the Ministry of Works and Transport (Works) has annually been publishing a Sectoral Statistics document from data collected from various stakeholders. These include Government Ministries, Departments, Agencies, Institutions and the Private Sector.

The document contains key basic statistics in Construction Industry at national level that covers a period of a year 2022. The interpretation of these statistics is expressed in terms of numerical, graphs, histograms and pie-charts.

Ambassador Eng. Aisha S. Amour
Permanent Secretary
Ministry of Works and Transport (Works)

CHAPTER ONE

INTRODUCTION

Construction Industry Sector Statistics provides a synopsis of Construction Industry issues and other relevant information within the Ministry of Works and Transport (Works) and its Institutions. Their effectiveness, appropriateness and adequateness contribute a lot to the development of other socio-economic activities. Adequate and appropriate data and information is also a prerequisite for strategic planning. In other words, statistics play a major role in strategic planning, management, monitoring and evaluation of the sector. In realization of the importance of information and data, the Ministry of Works and Transport (Works) publishes on annual basis information and data related to Construction Industry Sector. The objective of this publication is to facilitate close monitoring of the performance of the Sector.

For any data to be meaningful there is a need of updating them at a frequency that would ensure meeting users expectation. In view of this fact, information and data contained in the Ministry's data bank are updated annually using inputs received from different stakeholders including Governments Ministries, Departments, Institutions, Agencies and the Private Sector. The analysis which includes histograms, charts and graphs are used to show trends and behaviours for quick visual interpretation of the presented data of the Sector.

This document is divided into four chapters: Chapter one is the introductory part; brief on basic background data and statistics on Road Network for Tanzania Chapter two provides information on Works Sector Recurrent and Development Budget status; Chapter three contains, Road Condition, Road accidents, and Motor Vehicle and Plant Registration in Tanzania Mainland; information and statistics on other Institutions of the Sector namely TEMESA, TBA, ERB, AQRB, NCC, RFB, CRB; ICoT and Construction, upgrading and Rehabilitation of Airports. Chapter four contains statistics for Local Roads and Employment generated during the implementation of Works Sector Development projects. It is important to note that this document does not contain all the required data and information for the Construction Sector. In a nutshell, the document provides a summary on data and information for core activities performed by the Ministry (Works). However, comments and inputs are invited from all stakeholders for the purpose of improving it in the future.

BASIC BACKGROUND DATA

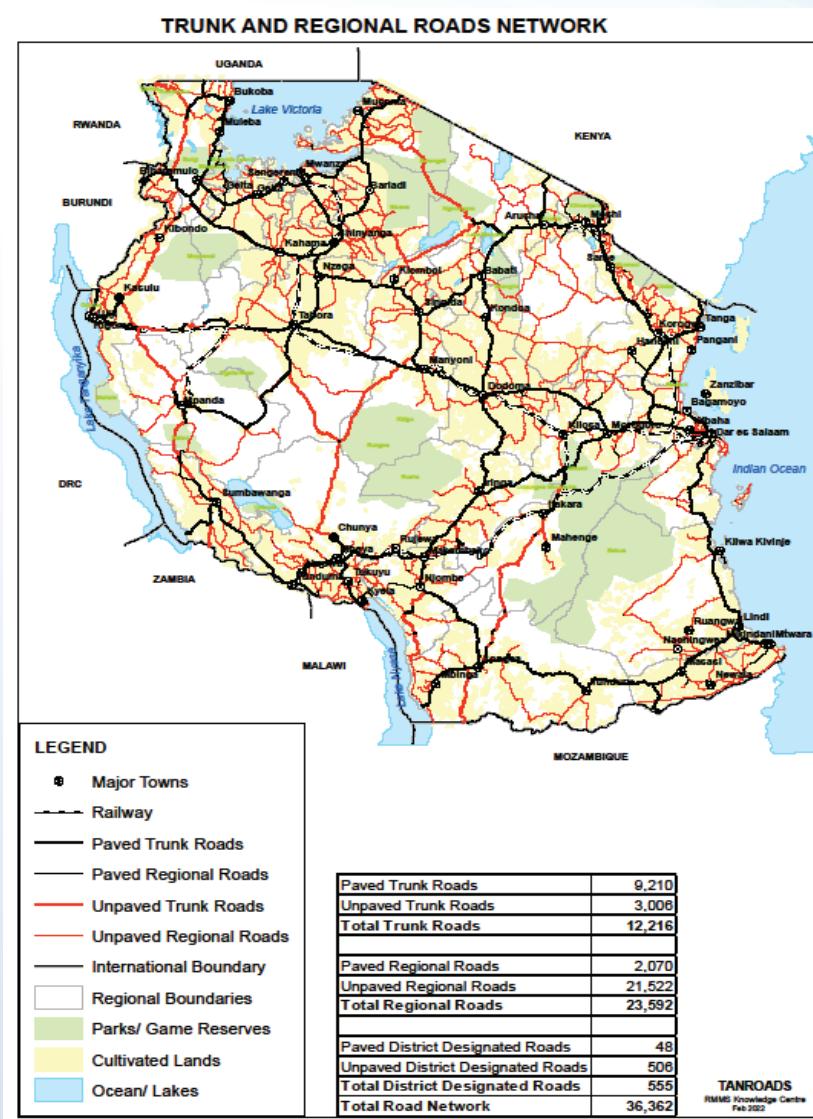

Table 1: Data Describing Tanzania

S/N	Particular	Data/Information
1.	Location	East Coast of Africa between latitudes 1°S and 11°S and between longitudes 29°E and 41°E.
2.	Share border with	Kenya and Uganda to the North, Rwanda, Burundi and Democratic Republic of Congo to the West, Zambia, Malawi to the South West and Mozambique to the South.
3.	Total area of Tanzania	939,701 km ² of which 58,100 km ² is water representing a part of Lakes Victoria, Tanganyika, Nyasa and several other smaller lakes, rivers and sea.
4.	Capital City	Dodoma with population of 3,085,625 people (2022)
5.	Number of Regions	Tanzania Mainland 26 regions and Zanzibar 5 regions
6.	Number of Districts	Tanzania Mainland 168 districts and Zanzibar 10 districts
7.	Arable Land	15.1 million hectare
8.	Cultivated Land per year	5.1 million hectare
9.	Population of Tanzania Mainland	About 59.85 million people (2022).

S/N	Particular	Data/Information
10.	Other major cities with their estimated population (2022)	Dar es Salaam (5,383,728), Mwanza (3,699,872), Arusha (2,356,255), Tanga (2,615,597) and Mbeya (2,343,754).
11.	Average population density of the country	51 inhabitants per square kilometer (in h/km ²)
12.	Total Road Network (2022)	181,190.04 km
13.	Railway Network	The railway system of mainland Tanzania has a total track length of 3,676 kilometers (km) with two separate networks, run by two separate organizations. These are the Tanzania – Zambia Railway Authority (TAZARA), which maintains and operates 975 km network including the Tanzania- Zambia railway line from Dar es Salaam to Kapiri Mposhi in Zambia, and Tanzania Railways Corporation (TRC) which maintains and operates over 2,706 km network including Tanzania's railway links to Kenya and Uganda.
14.	Major Airports	JNIA, KIA, Mtwara, Mwanza, Arusha and Songwe

S/N	Particular	Data/Information
15.	Ports Network	There are three (3) Main ports along coast namely Dar es Salaam , Mtwara and Tanga ports at Indian Ocean. Other Small Ports along coast includes Kilwa, Lindi, Mafia, Pangani and Bagamoyo. Main ports along lakes includes Mwanza north and south, Kigoma and Kyela , other Small Ports along lakes includes Kasanga Kibirizi ports at Lake Tanganyika, Bukoba, Kemondo bay, Nansio and Musoma at Lake Victoria and Itungi, Manda, Mbamba bay, Liuli ports at Lake Nyasa
16.	Major Mountains	Mt Kilimanjaro, Mt Meru, and Mt. Rungwe
17.	Major Rivers	River Rufiji, River Wami , River Ruvuma, River Kagera, River Songwe and River Pangani
18.	Major Lakes	Lake Victoria (68,800km ²), Lake Tanganyika (32,900km ²), Lake Nyasa (29,600km ²) and Lake Rukwa (5,760km ²)

Figure 1: Trunk and Regional Roads Network Map

CHAPTER TWO

WORKS SECTOR RECURRENT AND DEVELOPMENT BUDGET STATUS

The Recurrent and Development budget are for execution of both Ministry other charges and Development Projects respectively in line with plans and targets as described by the CCM Election Manifesto of 2015, National Development Vision 2025, Five Years Development Plan 2017/18 – 2021/22 and Sectoral Policies. Details of Recurrent and Development Budget are indicated in **Table 2 and Table 3**.

Table 2: Planned Recurrent Budget, Releases and Expenditure for the Period ending 30th June, 2022

Financial year	Approved budget	Released fund up to 30 th June	Expenditure up to 30 th June	Releases vs Budget	% of Expenditure vs Releases
2017/18	35,565,163,330.77	34,761,246,019.97	34,758,375,767.03	97.7	100
2018/19	43,907,615,755.20	42,601,134,846.85	42,574,375,355.35	97.02%	99.93%
2019/20	36,282,751,504.00	32,841,419,899.04	32,817,605,646.61	90.52	99.93
2020/21	40,143,330,487.56	34,661,805,099.16	26,540,671,378.01	86.35	76.57
2021/22	38,548,459,923.96	37,700,271,291.72	37,631,688,476.58	97.80	99.82

CHAPTER THREE

INSTITUTIONS UNDER WORKS SECTOR

Other Institutions whose data have been collected and analyzed include Tanzania National Roads Agency (TANROADS), Tanzania Electrical, Mechanical and Electronic Services Agency (TEMESA), Tanzania Building Agency (TBA), Roads Fund Board (RFB), National Construction Council (NCC) and regulatory bodies i.e. Contractors Registration Board (CRB), Engineers Registration Board (ERB), and Architect and Quantity Surveyors Registration Board (AQRB). The respective summary data of these Institutions have been given below:-

3.1 Tanzania National Roads Agency

The Tanzania National Roads Agency (TANROADS) is responsible for the maintenance and development of the Trunk and Regional Roads in Tanzania Mainland.

TANROADS was established on 1st July, 2000 by an order published in the Government Gazette, Notice No. 293 of 2000 under Section 3(1) of the Executive Agencies Act No. 30 of 1997, with the expectation of witnessing a significant improvement in road maintenance and development with respect to quality, efficiency and cost-effectiveness. The Agency is responsible for the management of 36,760.29km of Trunk Roads and Regional Roads according to the Roads Act No. 13 of 2007 and subsequent reclassification up to December, 2022.

The Agency specifically has established the maintenance directorate from which all road maintenance issues are technically and administratively handled. This Directorate is responsible for overall preparation, coordination and budgeting control of roads and bridges maintenance program as stipulated in the TANROADS Strategic and Business Plans. The Directorate has country-wide Regional Offices which are responsible for monitoring and supporting Trunk and Regional Roads to ensure inter-regional movements as well as weighbridge operations to regulate amount of load carried by vehicles.

3.1.1 Classified Road Network

The total classified road network in Tanzania Mainland is estimated to 181,190.04 km as of December, 2022. The Ministry of Works and Transport (Works) through Tanzania National Roads Agency (TANROADS) is managing the National Road Network of about 36,760.29km comprising 12,223.04km of Trunk and 24,537.25km of Regional Roads. The remaining road network of about 144,429.75km of Urban, District and Feeder Roads is under the responsibility of the President's Office-Regional Administration and Local Government (PORALG) through Tanzania Rural and Urban Roads Agency (TARURA).

3.1.2 Road Classification

Paved Roads

These are roads provided with a water resistant pavement designed to withstand traffic wear. They include bituminous surface dressing, asphalt pavements and concrete roads.

Unpaved “Gravel Roads”

These roads are mainly engineered and provided with drainage and running surface of gravel materials.

Unpaved “Earth Roads”

These are the roads formed or shaped by use of compacted local material. Mostly, these are within the District and Village roads. The current inventory of this category is not well established.

3.1.3 Road Conditions

Good Condition

Roads are classified under this category if they are free from defects and require only routine maintenance to keep them in that state. Road condition can objectively be measured by roughness index which indicate the extent of rutting and surface cracking. For gravel roads, gravel loss is also used to measure condition. The driving comfort for paved and gravel roads range between 100-120 km/h and 70-80km/h respectively.

Fair Condition

Under this category, it is anticipated that the road will have significant defects and requires both routine and periodic maintenance to prevent failure. The driving speed for paved and unpaved roads range from 70 - 90 and 20 - 40km/h respectively.

Poor Condition

Poor roads can be termed as those with pavement failure for over 20 percent of the paved area, as shown by rutting and cracking. For gravel roads failure will result in parts of the sub-grade to be exposed and significantly deformed. Roads in poor condition require rehabilitation or reconstruction to bring them to the original condition.

Results of the survey carried out by TANROADS on national road condition is shown in **Table 5** and **Table 6**

Table 4: National Road Network of Tanzania by Category as of December, 2022

Surface Type	Paved (km)	Unpaved (km)	Total (km)
Trunk Roads	9,332.32	2,890.72	12,223.04
Regional Roads	2,344.35	22,192.90	24,537.25
Total Road Network	11,676.67	25,083.62	36,760.29

Source: TANROADS, 2022

Table 5: Condition of Trunk and Regional Roads as of December, 2022

Road Class	Condition of National Road Networks						Total			
	Good	Percent (%)	Km	Fair	Percent	Km	Poor	Percent	Km	Total
Trunk (paved)	5,661.95	63	1,854.82	21	1,451.93	16	8,968.70	100		
Trunk (unpaved)	504.24	23	1,518.07	69	167.22	8	2,189.53	100		
Regional (paved)	872.08	46	492.97	26	548.1	28	1,913.15	100		
Regional (unpaved)	5,605.88	25	14,952.90	68	1,639.22	7	22,198.00	100		
Total Surveyed National Roads Network	12,644.15	36	18,818.76	53	3,806.47	11	35,269.38			

Note: The total road network was not covered due to the fact that, 1,490.91km were not surveyed due to the reasons that road works were in progress, others were impassable and some are under TANAPA.

3.1.4 Construction, Upgrading and Rehabilitation of Airports

Tanzania Mainland has a total of 368 aerodromes, out of which 58 are maintained and operated by Tanzania Airport Authority (TAA). Construction, upgrading and rehabilitation of airport works is under TANROADS. Details of each airport is indicated in

Table 8

Table 8: Status of Airports as of December, 2022

3.2 Tanzania Electrical, Mechanical and Electronics Services Agency

Tanzania Electrical, Mechanical and Electronics Services Agency (TEMESA) is established under the Ministry of Works and Transport (Works) with the aim of providing efficient and effective electrical, mechanical and electronic services, reliable and safe ferry transport services and hiring of equipment to government institutions and the public at large. The Agency was established on 25th August 2005 in accordance with the Executive Agencies Act No. 30 of 1997. **Table 12** and **Table 13** provide number of ferries operated by TEMESA and their capacities respectively.

Table 12: Status of Ferries and their Capacities in each Location as of December, 2022

S/N	OPERATIONAL LOCATION	REGION	NAME OF FERRY	FERRY CAPACITY	YEAR OF PURCHASE	STATUS
1.	Magogoni - Kigamboni	Dar es salaam	MV. Magogoni	Ton 500 (Passengers 2000, Vehicles 60)	2008	Working

3.3 Tanzania Building Agency

Tanzania Building Agency (TBA) is the Government's Executive Agency under the Ministry of Works and Transport (Works) with a primary mandate of providing quality accommodation to Government and Public Servants as well as building consultancy services to the Government. The Agency was established in May 2002 in accordance with the Executive Agencies Act No. 30 of 1997. A list of Government Houses and Plots countrywide owned by TBA is indicated in **Table 15**.

Table 15: Number of Government Houses and Plots Countrywide as of December, 2022

3.4 Roads Fund Board

Road Fund Board (RFB) is responsible for disbursing funds which are used in maintenance activities related to road works for both National Roads and District Roads. Parliament of the United Republic of Tanzania enacted the roads Tolls (amendment) (No.2) Act. 1998 which established the road Fund and the Roads Fund Board. The Act was revised in the years 2006 and is now referred to as the road and Fuel Tolls Act, CAP 220 (Revised edition 2006).

The purpose of the Roads Fund is to provide an adequate and stable flow of funds for road maintenance and rehabilitation and to enhance the transparency between revenues collected from road users and the spending on the road network. It would further provide a direct linkage between the road users and the road agencies that are spending the money to provide an agreed service.

3.4.1 Road Maintenance Activities

Road maintenance means all works carried out to preserve the various components of a road in the required condition in order to provide safe and effective passage to the road users. The components (maintenance scope) include the pavement, shoulders, drainage, road signs, structures and ancillary works.

(i) Routine Maintenance

This term incorporates all the activities previously defined separately as routine and recurrent maintenance. The term routine maintenance shall therefore mean all maintenance

works required continuously or at intervals on every road whatever its engineering characteristics or traffic volume, and comprises of activities such as grass cutting, drain cleaning, culvert and bridge cleaning and – maintenance, road furniture and bridge guide rails maintenance, paved road patching, edge repair, crack sealing, and line remarking, and also unpaved road grading, shaping, and pothole repairs.

(ii) Bridge Maintenance

The term bridge maintenance means localized maintenance works on bridges that aim to repair or restore the bridge and its various components to the original specification. Upgrading by widening or improving a bridge beyond its original design shall be included under Development activities.

(iii) Spot Improvement

The term spot improvement means localized maintenance works carried out on short sections (typically 1 km or less) of roads in order to ensure a reasonable level of pass ability, and comprises of activities such as road surface repairs, embankment repairs, culvert and drainage repairs, localized road reshaping and re-gravelling, and the construction of diversion. Spot improvement is usually done due to the excessively poor condition of a road over a short section that threatens the flow of traffic. Spot improvement can be used on both paved and unpaved roads; and includes some works previously defined as emergency maintenance.

(iv) Emergency Maintenance

The term emergency maintenance means all maintenance activities required to open or repair roads, bridges and other parts of the road infrastructure after a natural or other unforeseen disaster like fire, major accidents that cause damage to the road and natural events like floods. Repairs to roads and bridges that have deteriorated over time cannot be included in this category.

(v) Periodic Maintenance

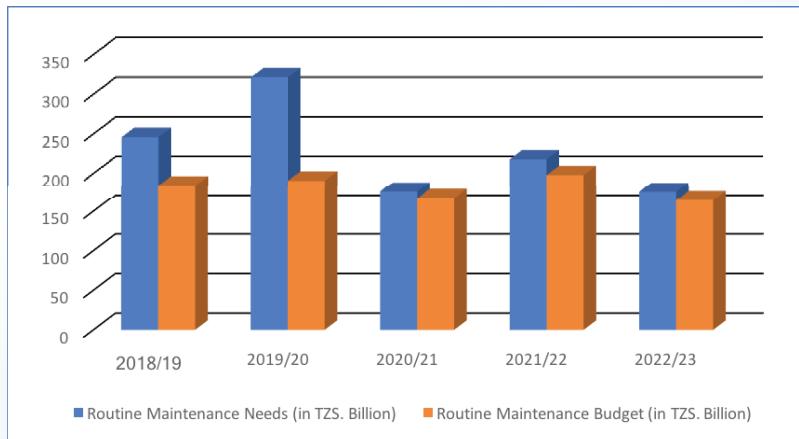

The term periodic maintenance works carried out at intervals of several years. Some activities included here are also referred to as preventative maintenance. Typical activities on paved roads include resealing, overlays of less than 100 mm, fog sprays and shoulder re-forming. Pavement layer reconstruction or the addition of a pavement layer must not be included here, but under rehabilitation. The maintenance needs for the road related activities has been always bigger compared to the budgeted funds every year which on turn create a big financing gap both routine maintenance and periodic maintenance as shown in the **Table 16** and **Table 17** respectively.

Table 16: Trend Level of Maintenance Coverage of Routine Maintenance Needs as of December, 2022

Financial Year	2018/19	2019/20	2020/21	2021/22	2022/23

3.5 Contractors Registration Board

The Contractors Registration Board (CRB) is a Government Regulatory Board under the Ministry of Works and Transport (Works) established by Act of Parliament No 17 of 1997 with the objective to register and regulate all types of Contractors and to promote the development of their capacities for the purpose of protecting consumers of construction services in Tanzania.

3.6 Engineers Registration Board

Engineers Registration Board (ERB) is a statutory body established under the Act of Parliament No. 15 of 1997 as amended by the Engineers Registration Act No. 24 of 2007.

The function of ERB is to regulate and monitor engineering practice in Tanzania through promotion of engineering excellence among local engineers, engineering technicians and engineering consulting firms with a view to enhance their competitiveness and professionalism in the engineering practice”

3.8 National Construction Council

National Construction Council (NCC) is a body corporate established under the National Construction Council Act of 2008, Chapter 162. The functions of the Council is to promote and provide strategic leadership for the growth, development and expansion of the construction industry in Tanzania with emphasis on the development of the local capacity for social-economic development and competitiveness in the changing global environment.

3.9 Institute of Construction Technology (ICoT)

The Ministry of Works and Transport (Works) has established the Institute of Construction Technology (ICoT) registered with NACTE with registration number REG / SAT / 035. The institute was established by merging the former Morogoro Works Training Institute (MWTI) with the Appropriate Technology Training Institute (ATTI) of Mbeya under the Ministry of Works and Transport (Works). The headquarters of this Institute (Main Campus) is located in Morogoro where the Morogoro Works Training Institute (MWTI) and the Branch (Campus) are located in Mbeya.

3.9.1 Number of Students Enrolled in the Academic Year 2022/23

(i) Basic Technician Certificate Courses (NTA LEVEL 4)

S/N	Course Title	Number of Students		
		Male	Female	Total
1	Mechanical	16	1	17
2	Civil	13	4	17
3	Electrical	35	5	40
	TOTAL	64	10	74

(iv) Vocational Education and Training (VET)

• First Year

S/N	Course Title	Number of Students		
		Male	Female	Total
1	Auto Electric	32	6	38
2	Civil Draughting	4	1	5
3	Domestic Electrical installation	69	15	84
4	Masonry and Brick laying	1	0	1
5	Motor Vehicle Mechanics	34	0	34
6	Plumbing and Pipe Fittings	23	20	43
7	Road Construction	3	2	5
8	Welding and Metal Fabrication	2	0	2
	TOTAL	168	44	212

Source: ICoT, 2022

• Second Year

S/N		Number of Students		
	Course Title	Male	Female	Total
1	Auto Electric	30	1	31
2	Civil Draughting	5	0	5
3	Domestic Electrical installation	37	11	48
4	Masonry and Brick laying	1	0	1
5	Motor Vehicle Mechanics	24	0	24
6	Plumbing and Pipe Fittings	15	18	33
7	Road Construction	8	3	11
8	Welding and Metal Fabrication	7	0	7
TOTAL		127	33	160

CHAPTER FOUR

LOCAL ROADS

4.1 Tanzania Rural and Urban Roads Agency (TARURA)

The management of District Roads that is, Collector, Feeder and Community roads is under the jurisdiction of President's Office Regional Administration and Local Government (PO-RALG). The District Roads are managed by the recently established Tanzania Rural and Urban Roads Agency (TARURA). This Agency has Council Office in 184 Local Government Authorities which are coordinated by 26 Regional coordination Offices in each Region. The Council Offices are responsible for inventory and condition surveys, planning, prioritization, project design, tendering and supervision of District road maintenance and development works.

The President's Office Regional Administration and Local Government has an oversight function of preparing policies and strategies in cooperation with key stakeholders in the sector, as well as being responsible for coordination and monitoring of the district roads activities in the councils and to provide/coordinate capacity building and advisory support for the councils. Details for Local Road Network are indicated in **Table 30**.

Table 30: Local Roads Network Length (km) as of December, 2022

S/No		Category	Road Type	Length (Km)	Length out of total Local Roads (percent)
	Local Roads	Collector	Paved	1,491.19	1.03
			Unpaved	55,172.89	38.20
		Community	Paved	33.21	0.02
			Unpaved	18,766.29	12.99
		Feeder	Paved	1,323.08	0.92
			Unpaved	67,643.12	46.83
Total Local Roads				144,429.77	100
